# CSO-X

The CSO-X (Cannonball Special Operations Experimental) program is an exclusive initiative for McLaren 720s, 750s, and 765LT enthusiasts. Pioneering McLaren performance enhancement, CSO-X utilizes experimental parts to explore untapped engineering potential. With dedication, our team fearlessly ventures into uncharted territories, propelling McLaren vehicles into new dimensions of power and performance. Elevate your McLaren to extraordinary heights and embark on an unforgettable journey.

Driven by a relentless passion for innovation, we fearlessly test and refine procedures to unveil the latent capabilities of McLaren's engineering marvels. Committed to pushing power levels beyond convention, our pursuit of the elusive weak link in the performance chain defines the CSO-X Innovation Lab, where McLaren's hidden power is revealed through groundbreaking advancements.

## SPECIFICATIONS

Venture into unexplored territories with CSO-X, where daring curiosity and technical expertise merge. Our team fearlessly takes on the trials of pushing boundaries, guided by meticulous experimentation and insightful analysis. Committed to propelling McLaren vehicles into uncharted dimensions of power and performance, Cannonball Garage introduces the experimental power of CSO-X. Experience cutting-edge technology that redefines automotive performance, elevating your McLaren 720s, 750s, or 765LT to extraordinary heights and transcending conventional limits.

HP/TQ BASED ON MS109 FUEL AND OPTIONAL CSO ENGINE UPGRADE
