CSO-R

Welcome to the world of road dominance with our CSO-R package for McLaren 720s/750s/765LT. Elevate your McLaren's power with larger turbos, enhanced intake/exhaust systems, high-volume injectors, and precise ECU calibration. Unleash 1100+ wheel horsepower with race-grade fuel for an unparalleled driving experience. Dominate the road and set new standards!

This exceptional package embodies the pinnacle of our proficiency and steadfast dedication. Through this metamorphosis, we unleash levels of power that will overpower anyone daring to oppose you. The larger turbochargers and high-flow exhaust system not only optimizes flow but also treats your ears to an aggressive and captivating soundtrack that is sure to turn heads when you lean into the throttle.

CSO-R delivers precision ECU tunes, optimizing engine power and responsiveness, distinct from generic "Stage 1 & Stage 2" tunes. Our meticulous approach avoids underperformance and potential risks through data-logging and dyno testing. Calibrations are tailored to your vehicle's unique characteristics, unlocking its full potential while prioritizing reliability.

The package features cutting-edge technology like Map Switching and a dedicated valet map for added security, ensuring dynamic power delivery. Enthusiasts seeking an extra thrill can opt for the Rolling Anti-Lag upgrade, providing a potent burst of power in motion for an enhanced driving experience.
